CATALYTIC ACTIVITY: L-phenylalanine = trans-cinnamate + NH(3).
PATHWAY: Phenylpropanoid biosynthesis; first step.
SUBCELLULAR LOCATION: Cytoplasmic (Probable).
PTM: CONTAINS AN ACTIVE SITE 4-METHYLIDENE-IMIDAZOLE-5-ONE (MIO),
WHICH IS FORMED AUTOCATALYTICALLY BY CYCLIZATION AND DEHYDRATION

PATHMAY: Phenylpropanoid biosynthesis; first step.
SUBCELLULAR LOCATION: Cytoplasic (Probablet step.
PTM: CONTALMS AN ACTIVE SITE 4-METHYLIDEME-IMIDAZOLE-5-ONE (MIO).
WHICH IS FORMED AUTOCATALYTICALLY BY CYCLIZATION AND DEHYDRATION
OF RESIDUES ALA-SER-GLY (BY SIMILARITY).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              FUNCTION: THIS IS A KEY ENZYME OF PLANT METABOLISM CATALYZING THE FIRST REACTION IN THE BIOSYNTHESIS FROM L-PHENYLALANINE OF A WILL VARIETY OF NATURAL PRODUCTS BASED ON THE PHENYLPROPANE SKELETON

Plant Physiol. 102:71-83(1993).
PIRST REACTION IN THE BIOSYNTHESIS FROM L-PHENYLALANINE OF A WIDE VARIETY OF NATHRAL PROPENTS RASED ON THE PHENYLAPOPANE SKELETON.
PLANTAPIC ACTIVITY: L-phenylalanine - trans-cinnamate + NH(3).
PLANTAPIC ACTIVITY: L-phenylalanine - trans-cinnamate + NH(3).
PRH-WAY: Phenylpropanoid biosynthesis; first step.
PRH-ONTAINS AN ACTIVE SITE 4-METHYLDENE-IMIDAZOLE-5 ONE (MIO).
WHICH IS FERMED AUTOCATALTICALLY BY CYCLIZATION AND DEHYDRATION
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Eukaryota, Viridiplantae, Streptophyta, Embryophyta; Tracheophyta; Spermatophyta: Magnoliophyta; eudicotyledons; core eudicots; Rosid eurosids I; Malpighiales; Salicaceae; Populus

-!- FUNCTION: THIS IS A KEY ENZYME OF PLANT METABOLISM CATALYZING THE FIRST REACTION IN THE BIOSYNTHESIS FROM L-PHENYLEA-RANINE OF A WIDE VARIETY OF NATURAL PRODUCTS BASED ON THE PHENYLEA-PANE SKELETON -!- CATALYTIC ACTIVITY: L-phenylalanine - trans-cinnamate + NH(3).
-!- PATHWAY: Phenylpropanoid biosynthesis; first step.
-!- SUBCELLULAR LOCATION: Cytoplasmic (Probable).
-!- PTM: CONTAINS AN ACTIVE SITE 4-METHYLIDENE-IMIDAZOLE-5-ONE (MIO), WHICH IS FORMED AUTOCATALYTICALLY BY CYCLIZATION AND DEHYDRATION
